# DAVID IYOKE

📍 Abuja, Nigeria | 🔗 github.com/Davetakesoff | 📧 iyokedavid@gmail.com

## PROFESSIONAL PROFILE

Cloud and DevOps Engineer bridging robust infrastructure management with automation and technical writing. Specialized in virtual machine administration, Linux environments, and containerized deployments using Docker and Nutanix. Experienced in AWS cloud services, API-driven automation, and building scalable backend logic with Python. Combines rigorous system architecture with clear, analytical documentation to deliver high-performance, resilient technical solutions.

## TECHNICAL SKILLS

- **Cloud & Infrastructure:** AWS Services, Nutanix Virtual Machines, Linux Administration, Domain Name Services (DNS), cPanel, VM Backups/Snapshotting.
- **DevOps & Containerization:** Docker, Nginx Load Balancing, API Integration, Environment Portability.
- **Programming & Scripting:** Python, Bash.
- **Technical Writing & Documentation:** Systems Architecture Documentation, Technical Blogging, Cultural Commentary, Content Strategy.
- **Tools & APIs:** Git/GitHub, Telegram Bot API, Groq LLM Integration, Nutanix APIs.

## PROFESSIONAL EXPERIENCE

**Cloud and DevOps Engineer (NYSC)** | Suburban Fiber Co. *Late 2025 – September 2026*

- Administered scalable infrastructure workloads, managing virtual machine deployment and lifecycles utilizing Nutanix and Linux environments.
- Engineered an automation script leveraging Nutanix APIs to streamline the provisioning and creation of new virtual machines.
- Managed Domain Name Services (DNS) and cPanel hosting environments, ensuring high availability and secure routing.
- Executed routine infrastructure maintenance, including systematic VM backups and snapshotting for disaster recovery.
- Provided Tier-2 customer assistance, directly resolving complex technical issues related to cloud infrastructure and domain services.

**Technical Writer & Publisher** | MonoPostmodern & Nate on Digital *2025 - Current*

- Author and manage two distinct digital publications bridging the intersection of technology and culture.
- Draft analytical technical documentation, engineering breakdowns, and systems architecture commentary (*Nate on Digital*).
- Publish long-form cultural philosophy and observational commentary (*MonoPostmodern*), establishing a cohesive digital brand.

## FEATURED ENGINEERING PROJECTS

**Franglais | Bilingual AI Microservice & Telegram Bot** | *Python, Groq API, Docker*

- Architected and deployed a live, context-aware bilingual language assistant (Franglias) utilizing Python for core application logic and the Groq API for high-speed LLM inference.
- Containerized the entire application within Docker, ensuring environment parity, robust portability, and seamless production deployment.
- Designed sliding-window context buffers and state management protocols to process real-time conversational parsing.

**Distributed Web Environment & Load Balancing** | *Docker, Nginx, WSL*

- Architected a localized load-balancing infrastructure using an Nginx reverse proxy within WSL to distribute web traffic across multiple Docker containers.

## EDUCATION & CERTIFICATIONS

**Cloud Computing Specialization (AWS)** | Neocloud Technologies *2024*

- Completed intensive training focused on cloud architecture, deployment strategies, and Amazon Web Services (AWS) ecosystem management.

**Bachelor of Science in Computer Science** | University of Benin (UNIBEN) *2017 – 2023*

## LANGUAGES

- **English:** Native / Fluent
- **French:** Intermediate (Targeting DELF B2 Certification – December 2026)
- **Nigerian Pidgin:** Fluent
